SKILLS

- Tableau
- Dashboarding
- SQL
- Python
- Excel
- Dataiku

Extra Projects

1) Help-Desk Tableau Dashboard

This is an incident team report generator dashboard made by myself using Tableau and the data is being feed using excel worksheet. It is available at my tableau public server.

2) TEDX Talks Dashboard

Have created a tableau dashboard using SQL and Tableau as a part of global data challenge, the dashboard gives all the relevant additional insights about the talks.

3) Space Mission Dashboard

Have created a tableau dashboard using SQL and Tableau as a part of global data challenge, which answers all the relevant questions asked in challenge and also give additional insights about space missions launched by different countries from 1957 to 2022.

SUMMARY

I have a total of 6.0 years' worth of experience and have been into multiple projects and teams, I am an energetic presenter and confident communicator with the ability to circulate information in a way that is clear, efficient for end-users. Experience in working with Agile methodology and have experience in SQL, Tableau, Excel, ETL also proficiency on Data Transformation, Data Blending-Pattern identification. Ability to handle and work on larger datasets and manipulate and analyse large and complex data sources with the right decisions on data availability.

EXPERIENCE

Innovaccer: Jan'2024 – Present

• Designed interactive and dynamic tableau dashboards to effectively visualize complex data sets and KPIs, enabling stakeholders to quickly identify trends and insights.

• Provided technical support and training to end users, improving their tableau proficiency and utilization of self-service analytics capabilities.

• Created action filter, parameters and calculated fields for preparing the tableau dashboards.

• Implemented Python scripts for loading data from SFTP to S3 and minimized execution time with multiprocessing.

• Implemented data validation and error handling mechanisms that reduced data inaccuracies ensuring reliable analysis and maintain the quality of the work and data on the dashboards.

• Design and build ETL workflows using python and SQL that pull data from client systems as scoped while complying with respective internal standards.

• Mentor juniors to follow organization's best practices for all the deliveries.

ZS Associates: Oct'2021 – Jan'2024

• Working with clients to understand business needs and translate those business needs into actionable dashboards in Tableau.

• Worked on different kind of LOD's and various charts to build the interactive dashboards.

• Guide and mentor juniors in best practices for project deliveries.

• Worked with other team members to complete time sensitive projects and achieve deadlines.

• Performed analysis and proposed solution to the data support team to get the correct financial numbers from the input data source.

• Built ETL Data Pipeline on Data Science Studio (Dataiku) using Python and Snowflake SQL to meet business requirements and automated data ingestion process.

•Coded Python scripts for a BI project for loading data from SharePoint to S3.

• Created various python libraries for fixing various platform issues like halting the tableau hyper export within the set threshold, monitoring the state of every ELT pipeline in the platform, etc.

• Have created a framework (Clean data layer) using python to perform the Qc checks on every dataset the team uses and informed if any dataset fails in any checks.

Infosys: Feb'2019 – Oct'2021

• Publishing interactive dashboards to Tableau Server.

• Performed analysis and proposed solutions to the support teams that ultimately improved team efficiencies, leading to a 60% reduction in tickets thus reducing manual work.

• Automating the Tableau deployments using RLM tool.

• Designed, created and maintained templated visualizations for client facing reporting deliverables.

EDUCATION

Bachelor of Computer Engineering – July-2018
The Northcap University, Gurugram

12th, CBSE(Mar-2014)
N.C. Jindal Public School, New Delhi

10th, CBSE(Mar-2012)
N.C. Jindal Public School, New Delhi

CERTIFICATION

Operations Management:
Infosys certified Kanab practitioner

Tableau Certification:
Infosys certified Tableau developer

MySQL Certification:
SQL for Data Analytics and Business Intelligence from Udemy Certificate of SQL from Hacker-Rank
